Contents Volume 73, 2004

VOL. 73, NOS. 1–4

Publisher's note 1

Impact of transverse and longitudinal dispersion on first-order degradation rate constant estimation
G.A. Stenback, S.K. Ong, S.W. Rogers and B.H. Kjartanson 3

Magnetic resonance imaging of nonaqueous phase liquid during soil vapor extraction in heterogeneous porous media
Y. Chu, C.J. Werth, A.J. Valocchi, H. Yoon and A.G. Webb 15

Infiltration of PCE in a system containing spatial wettability variations
D.M. O'Carroll, S.A. Bradford and L.M. Abriola 39

Plant aided bioremediation in the vadose zone: model development and applications
K. Sung, M.Y. Corapcioglu and M.C. Drew 65

Mechanisms of electron acceptor utilization: implications for simulating anaerobic biodegradation
M.E. Schreiber, G.R. Carey, D.T. Feinstein and J.M. Bahr 99

Geochemical stability of phosphorus solids below septic system infiltration beds
M.A. Zurawsky, W.D. Robertson, C.J. Ptacek and S.L. Schiff 129

A triple-continuum approach for modeling flow and transport processes in fractured rock
Y.-S. Wu, H.H. Liu and G.S. Bodvarsson 145

Biogeochemical processes at the fringe of a landfill leachate pollution plume: potential for dissolved organic carbon, Fe(II), Mn(II), NH_4, and CH_4 oxidation
B.M. van Breukelen and J. Griffioen 181

Transport and reduction of nitrate in clayey till underneath forest and arable land
P.R. Jørgensen, J. Urup, T. Helstrup, M.B. Jensen, F. Eiland and F.P. Vinther 207

Interpretation of injection–withdrawal tracer experiments conducted between two wells in a large single fracture
K.S. Novakowski, G. Bickerton and P. Lapcevic 227

A PCE groundwater plume discharging to a river: influence of the streambed and near-river zone on contaminant distributions
B. Conant Jr., J.A. Cherry and R.W. Gillham 249

Errata

Erratum to "A constitutive model for air–NAPL–water flow in the vadose zone accounting for immobile, non-occluded (residual) NAPL in strongly water-wet porous media" [J. Contam. Hydrol. 71 (2004) 261–282]
R.J. Lenhard, M. Oostrom and J.H. Dane 281

A constitutive model for air–NAPL–water flow in the vadose zone accounting for immobile, non-occluded (residual) NAPL in strongly water-wet porous media
R.J. Lenhard, M. Oostrom and J.H. Dane 283
